The following information is provided for the convenience of the bidders, and is not a part of the Addenda. Questions and requests for clarifications are repeated for all those who have the plans and specifications followed by the response.

2-1 Question:

Please provide exhibit D-1 “Lead-containing paint/coatings abatement work plan” and exhibit D-2 “Asbestos abatement work plan” referenced in General Notes #9 on sheet A0.01.

Response: **Addendum #2** to provide Exhibit D-1 "Lead-Containing Paint/Coating Abatement Work Plan," and Exhibit D-2 "Asbestos Abatement Work Plan."

2-2 Question:

The south wall of Hallway 103 & 105 states (2) Layers for Keynote 219. Please specify what type of material the layer underneath is.

Response: A layer of Chip Board is under the existing Gypsum Board.
2-3  Question:

Please verify if the existing gym floor able to support scissor lifts for elevated work.

Response: Existing floor was not designed for scissor lifts. Contractor is responsible for construction means and methods, i.e. shoring, as required.

2-4  Question:

LEED is referenced in spec sections 06 41 00 and 07 21 00. Will LEED submittals be required for these materials?

Response: LEED submittals are not required for materials stated above.

2-5  Question:

General Notes #7 on S1.1 references a 2% structural steel allowance and Demolition Notes #9 on S1.1 references a 10% contingency for supplemental structural work. Will these allowances and contingencies be required for this project?

Response: Yes, these allowances and contingencies will be required for this project.

2-6  Question:

Section 07 54 23 No base insulation is called for Details 5, 11, 18, 23, 29 on A10.40 shows 1 ½ please clarify? Details 23 & 29 A10.40 show roof nailers not necessary for manufacturer’s warranty. Do you want nailers called out in Details 23 & 29?

Response: To clarify, the intent for the 2X roof nailers is to prevent screws from penetrating through the existing wood deck by the attachment of the fiberglass coverboard/roofing. If the roofing assembly can be accomplished without penetrating through the existing 2X roof planks, we are willing to review an alternate solution. The area between the nailers is filled with rigid insulation to prevent the deflection of the fiberglass board.

2-7  Question:

Section 07 54 23 Page 7 Walkway Installation 3.4 1. Include 250 lineal feet of installation within the Base Bid. Is that correct for these small roofs?

Response: Walkway pads are not required for this installation.

2-8  Question:

Specification section 01230-1.6B2, Alternate Bid #2, calls for providing paintable grade plywood sheathing. Please clarify if this paintable plywood is intended to be installed over the structural shear ply, or is this intended to be installed in place of the structural shear ply?
this paintable ply in installed in place of the structural ply, please provide the desired plywood material for this alternate that is a structural rated and paintable plywood.

Response: The paintable grade plywood is intended to be installed over the structural shear ply.
